Who We Are

Company overview

Saint Jude Technologies is a Building Envelope & Exterior Solutions company. We are not a roofing sheet shop. We are an engineering-led organisation that protects, improves and extends the working life of buildings.

Every engagement begins with technical diagnosis — understanding the building, the exposure, the substrate and the failure risk — before any material is named. That discipline is what separates a roof that lasts a generation from one that leaks in its third rainy season.

Contractor

We install and rehabilitate roofing, waterproofing, cladding, ceilings, facades, metalwork, solar and finishes with our own supervised crews.

Supplier & Distributor

We hold and distribute roofing, waterproofing, ceiling, railing and rainwater products, supplying other contractors and projects directly.

Consultant & Procurement Manager

We advise on specification independently and manage procurement of materials, equipment and labour on the client's behalf.

What We Do

The full solution set

Ten capability groups covering the complete building envelope and exterior — delivered as single packages or as one coordinated programme.

Roofing Systems

Residential, commercial, industrial and estate roofing; replacement, rehabilitation, repairs and performance upgrades.

Waterproofing

Roof, wall and basement waterproofing, leak investigation and long-life protective coatings.

Rainwater Management

Gutters, downpipes, outlets and stormwater drainage sized for Nigerian rainfall loads.

Ceilings & Cladding

PVC, gypsum and aluminium ceiling systems, soffits, wall cladding and facade improvement.

Windows & Doors

Aluminium sliding and casement windows, curtain walling, glazing, security and architectural doors.

Architectural Metalwork

Stainless steel railings, frameless glass balustrades, handrails, canopies and bespoke fabrication.

Solar Energy Systems

Roof-integrated mounting, panel installation, inverter and battery systems, commissioning and maintenance.

Painting & Coatings

Exterior and interior painting, protective and decorative coatings, surface preparation, repainting programmes.

Material Supply

Roofing, waterproofing, ceiling, railing and rainwater products supplied and distributed from stock.

Maintenance & Asset Care

Programmed inspections, annual maintenance contracts, condition assessments and repair programmes.

Who We Serve

Clients and sectors

We work for the organisations that build, own and maintain the built environment — and adapt our delivery model to how each of them operates.

Real Estate Developers

Estate-wide roofing and exterior finishing, unit by unit, on programme and to one consistent standard.

Multi-unit delivery · Bulk pricing · Phased handover

Architects

Buildable detailing, honest material advice and finishes that hold the design intent through to site.

Detailing support · Specification packs · Sample review

Construction Companies

A dependable envelope and finishing subcontractor with crews, materials and method statements.

Subcontract packages · Material supply · Site-ready crews

Government & Institutions

Documented procurement, compliant workmanship and clear reporting for public institutional works.

Documented procurement · Compliance reporting · Scale

Commercial Buildings

Facades, roofs, waterproofing and rainwater systems maintained so operations are never interrupted.

Planned maintenance · Out-of-hours works · Leak response

Homeowners

Premium roofing, ceilings, railings, windows and finishes for private residences, installed properly first time.

Transparent quotes · Premium finishes · Workmanship warranty

INDUSTRIES SERVED

Residential Developments · Estate Developers · Construction Companies · Architectural Firms · Engineering Consultants · Government Agencies · Schools & Universities · Churches · Hospitals · Hotels · Factories · Warehouses · Commercial Offices · Shopping Centres · Industrial Facilities

How We Deliver

Our nine-step project process

Every project runs through the same sequence. Nothing is skipped, and nothing is left to verbal agreement.

01 — Consultation
We listen to your project goals, constraints and timelines.

02 — Site Inspection
On-site survey to capture real-world conditions and risks.

03 — Proposal
Technical assessment and independent engineering recommendations.

04 — Quotation
Transparent, itemised pricing with no hidden allowances.

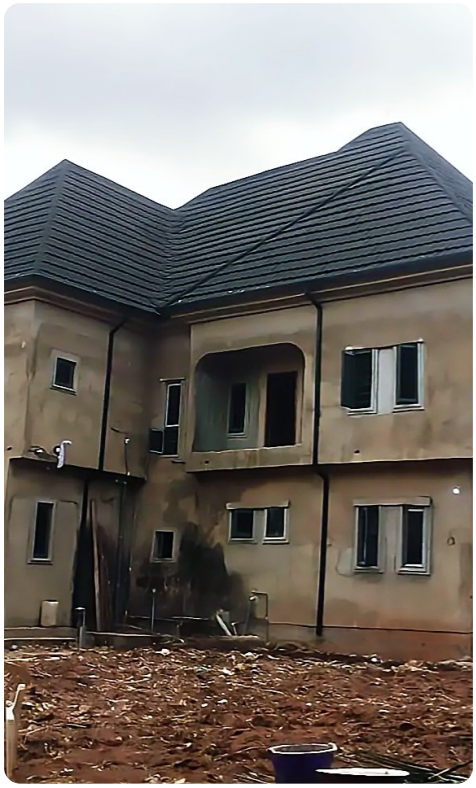
05 — Material Procurement
Supply from our own stock or trusted manufacturers, plus procurement of equipment and labour.

06 — Installation
Experienced crews working to documented method statements.

07 — Quality Inspection
Inspection checkpoints throughout and a final sign-off.

08 — Project Handover
Documentation, warranties and a client walkthrough.

09 — After-Sales Support
Responsive support and optional preventive maintenance programmes.



Selected Projects

Roofing, envelope and solar

A selection of completed works across roofing, envelope, metalwork and material supply.

Solar · Estate development, South-East Nigeria

Estate Roofing & Solar Energy Solution

Estate-wide roofing with roof-integrated solar arrays and waterproofed flat-roof detailing.

Residential · South-East Nigeria

Stone-Coated Roof — Private Residence

Full stone-coated tile roofing package with fascia, gutters and downpipes on a new-build duplex.

Commercial · Nigeria

Commercial Roof & Cladding Installation

Long-span metal roofing with matching wall cladding, flashings and rainwater goods.

Institutional · Nigeria

Institutional Roof Refurbishment

Large-span roof refurbishment with solar integration on an institutional building.

Estate · Nigeria

Estate Roofing Programme

Structural steel truss erection and roof covering across a multi-unit estate programme.

Residential · Nigeria

Contemporary Duplex Envelope

Roofing, exterior finishing and dark glass balustrade systems on a modern residence.

Selected Projects

Metalwork, supply and distribution

Metalwork · Nigeria

Frameless Glass Balustrades

Frameless tinted glass balcony balustrades with stainless fixings and spigots.

Metalwork · Nigeria

Interior Stair Balustrade

Glass stair balustrade with integrated step lighting and stainless handrail.

Metalwork · Nigeria

Ornamental Entrance Railing

Stainless steel entrance railing with gold ornamental infill panels.

Metalwork · Nigeria

Terrace Railing Fabrication

Bespoke stainless steel terrace railing with gold floral infill patterns.

Procurement · Nigeria

Coil Stock & Material Supply

Colour-coated coil stock held for supply, distribution and project procurement.

Procurement · Nigeria

Roofing Profile Production

Finished long-span roofing profiles produced and distributed to projects and contractors.

International Operations

Africa-wide delivery

We operate across Nigeria and deliver into markets throughout Africa. The engagement model flexes with the system we find ourselves in — sometimes we build, sometimes we supply, sometimes we manage procurement for a client's own team.

Direct Contracting

We mobilise and execute the works with our own supervision and crews.

Material Supply & Export

We supply roofing, envelope and finishing materials to projects across borders.

Procurement Management

We source, verify and manage delivery of materials, equipment and labour on the client's behalf.

Technical Consulting

We survey, diagnose and specify, then support the local team executing the work.

Why Saint Jude

- **Premium Materials**
  Manufacturer-grade materials sourced for the conditions of your site.
- **Quality Workmanship**
  Craft standards enforced through documented in-process inspections.
- **Timely Delivery**
  Programmes planned realistically and resourced properly so handover dates hold.
- **Independent Specification**
  We recommend the right material, not the one we are paid to push.
- **Experienced Team**
  Supervisors and crews who have delivered envelopes at estate and institutional scale.
- **Manufacturer Partnerships**
  Direct relationships with reputable manufacturers for supply security and pricing.
- **Transparent Pricing**
  Itemised quotations with clear scope boundaries — no surprise variations.
- **One Accountable Owner**
  A single point of contact from first inspection through after-sales support.
